For less than the cost of a standard starting salary, you get premium access to an entire research ecosystem dedicated to answering your questions and changing your world.

Since 2001, we have delivered \$2.4 billion in partner returns and savings.

Our world-leading Industrial PhD Program (iPhD) delivers and develops the people, technology and infrastructure to solve industry problems, provide commercial outcomes and develop future R&D leaders.

This unique ecosystem delivers high-impact research with a flexible project focus to answer key questions and create opportunities that don't generally arise from day-to-day, fixed-task-based business activities.

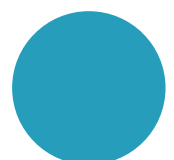

World-class academic training to ensure complex problem-solving ability
Intellectual academic rigour applied to ensure work is theoretically and empirically valid
Support from leading academics to ensure best solutions for industry partner needs
Industry-appropriate training to ensure initial/ongoing readiness for industry environment
Access to data to enhance research

iPhD Researcher embedded for 3 years

Industry Partner

Transformative Outcomes

Transformative iPhD outcomes include...

- Market fairness and efficiency
- Competitive advantage
- Enhanced decision-making ability
- Bespoke technology
- New products
- Consumer trust
- Substantial returns
- New jobs
- New skills
- Added commercial opportunity
- Permanent change to R&D capability
- Future R&D leaders created

RoZetta Institute Industrial PhD Program fact file

- Cost: \$50,000 p.a. for up to three years
- Established in 2001
- Over 200 graduates (65% in industry, 35% in academia, 5% in government)
- Approximately 2,500 industry questions answered
- 1,000 high-tech jobs created
- Current program has iPhD researchers embedded with industry partners, solving complex industry problems and delivering transformative outcomes
- Suitable iPhD researcher to meet specific business needs generally found in one to two months

“

RoZetta is my Formula 1 team. When I fed our data over into the Rozetta environment, they saw things we didn't see because we weren't looking for the things they were looking for. The iPhD Program let us tap youth - they think outside the box because there is no box! The Program is very well done - they matched the skill set that we were looking for with our business needs.
